«*Tempus velut fluuius est rerum quae fiunt*» *Marcus Aurelius* – *Tiden er som en strøm av hendelser*

Den romerske keiseren Marcus Aurelius beskrev tiden som en strøm av hendelser der de fleste spor etter mennesker og riker forsvinner. Noen få gjenstander overlever likevel århundrene – blant dem mynter og medaljer, små objekter som fortsatt bærer portretter, symboler og minner fra samfunnene som skapte dem.

Historien bak slike objekter er ofte langt større enn det som kan rommes i en katalogtekst. Hver mynt har sin egen bakgrunn, sine tidligere eiere og sin plass i en større historisk sammenheng. Mange samlere bidrar selv til å bevare denne historien gjennom sine samlinger, og blir dermed en del av fortellingen.

Blant samlingene i denne auksjonen finner vi en bemerkelsesverdig gruppe tidlige speciedalere fra Johan Sættem's samling. Serien omfatter noen av de viktigste utgavene fra tiden etter sølvfunnene på Kongsberg og er resultatet av flere tiårs samlararbeid. Vi er takknemlige for tilliten ved at deler av samlingen nå kan formidles videre til nye samlere.

En annen betydelig samling er Nils Henrik Sjos samling av kinesiske sedler. Gjennom flere tiår har han bygget opp en omfattende samling som speiler både Kinas dramatiske historie og forbindelsene mellom Kina og Skandinavia. Med dette og mange andre interessante objekter presenterer vi auksjon 42, som spenner fra antikkens mynter til nyere tids medaljer og sedler.

Antikke mynter

Den antikke avdelingen omfatter rundt seksti objekter, fra persiske gullmynter til bysantinske solidi. Et høydepunkt er en aureus preget under keiser Otho i år 69 e.Kr. – året med de fire keiserne. Hans korte regjeringstid gjør myntene særlig ettertraktede blant samlere.

Utenlandske mynter

Denne avdelingen rommer rundt 560 mynter fra middelalderen til nyere tid, med utropspriser fra 700 til 700.000 kroner. Blant høydepunktene er en amerikansk ½ cent fra 1793, en russisk 10-rubel i gull fra Peter I og en sølv-Srebrennik fra Vladimir I.

En gruppe på rundt trettifem vikingmynter fra Danmark og England skiller seg også ut, blant annet en penny preget i York ca. 952–954 under Erik Blodøks, da hersker over Northumbria.

Avdelingen inneholder også over hundre dukatpregninger fra blant annet Østerrike, Tyskland, Polen, Nederlandene, Danmark og Sverige – mynter som vitner om handel og makt i Europa gjennom flere århundrer.

Medaljer

Medaljeavdelingen viser historien gjennom minnemedaljer. Flere er utført av Ivar Throndsen og skildrer norsk organisasjonsliv på 1800-tallet. Blant høydepunktene er medaljer knyttet til kroningen av Haakon VII og dronning Maud i 1906 samt universitetets Kongens gullmedalje. En særlig bemerkelsesverdig gjenstand er en stor gullmedalje på 30 dukater fra Mainz fra 1730.

Norske mynter før 1874

Avdelingen åpner med penninger fra Olav Kyrres tid fra Mågefundet i Hardanger. Blant middelaldermyntene finner vi også en brakteat fra Sverre Sigurdssons tid og en sjelden hvid preget i Nidaros under erkebiskop Gaute Ivarsson.

Den senere perioden inkluderer blant annet populære speciedalere fra Christian IV og en rekke 2-mark-mynter med proveniens fra L. E. Bruuns berømte samling. Oppmerksomhet vil også rettes mot en sjelden prøvemynt på 8 skilling fra 1712 og en usirkulert speciedaler fra 1835 med vakker patina.

Norske mynter etter 1873

Avdelingen omfatter mynter etter innføringen av kronesystemet. Blant høydepunktene er en usirkulert 20-kroner i gull fra 1883, en 2-kroner fra 1888 og en svært tiltalende 50-øre fra 1880.

Sedler

Avdelingen med norske sedler inkluderer både tidlige sedler, Oscar-sedler, høye valører fra senere utgaver samt erstatnings- og specimen-sedler. Her finnes også en stor gruppe London-sedler fra 1942 og 1944, samt sedler fra Svalbard og ulike kredit- og rabattmerker.

Til slutt ønsker vi velkommen til auksjonen. Når disse objektene igjen skifter hender, fortsetter de sin ferd i historiens strøm. Vi håper katalogen vil by på både oppdagelser og gode muligheter for samlere.

Vi ser frem til spennende budgivning – og til å møte samlere og venner av numismatikken.

Vi sees på Grand Hotel!

AUKSJONSREGLEMENT

1. Følgende auksjonsbetingelser gjelder for alle budgivere som deltar på auksjonene til Oslo Myntgalleri AS. Ved å avgi bud så forplikter man seg til å følge auksjonsreglement. Auksjonen er offentlig og frivillig. Hvis ikke annet er opplyst vil det være flere innleverere til auksjonen. Objekter merket med en x bak objektnummeret er innlevert av Oslo Myntgalleri AS eller hovedaksjonærene til Oslo Myntgalleri AS.
2. Ethvert bud som blir avgitt er bindende. Budgivere må være myndige, 18 år.
3. Alle auksjonsoppdrag behandles omsorgsfullt, dog er ikke auksjonshuset ansvarlige for mulige feil eller misforståelser som skulle oppstå under auksjonen.
4. Auksjonshuset forbeholder seg retten til å avgjøre om personer får lov til å delta på auksjonen eller ikke. Videre kan auksjonshuset avvise bud, trekke tilbake, omgruppere eller dele objekter. Ved uenighet kan det bli utlyst ny budgivning for én eller flere objekter. Auksjonarius kan selv avgjøre hvem som får tilslaget på et objekt der dette er uklart.
5. Auksjonshuset forbeholder seg retten til å avvise bud fra kjøpere som er ukjente og/eller som ikke har oppgitt tilstrekkelige referanser. Utenlandske kunder og brukere av plattformen for direkte budgivning må registrere seg i god tid før auksjonen for å bli vurdert og godkjent som budgivere.
6. Oslo Myntgalleri er pliktig til å utvise nøyaktighet og aktsomhet i beskrivelsen av auksjonsobjektene. Ethvert objekt anses for autentisk og fra perioden som beskrevet hvis det ikke er gitt uttrykk for annet. Disputter vedrørende objekters ekthet vil kun bli behandlet hos The International Bureau for the Suppression of Counterfeit Coins (IBSCC), og en konklusjon fra IBSCC regnes som endelig.
7. Alle objekter selges i den tilstand som beskrevet og fremvist før auksjonsstart. Kjøperne har selv anledning til å besiktige objektene før auksjonen, og eventuelle reklamasjoner som gjelder beskrivelser, merknader og kvalitetsvurderinger, vil ikke bli akseptert etter klubbeslag. Auksjonshusets ansvar er begrenset på samme måte for de som har gitt forhåndsbud eller bud per telefon. Vurderinger gjort av en tredjepart, herunder gradingselskaper som f.eks. NGC, PCGS og ANACS, vil ikke bli regnet som gyldig reklamasjonsgrunn etter hammerslag.
8. Graderte mynter og sedler: Vi gir ingen garantier for ekthet eller merknader på mynter og sedler som er slabbet i lukkede beholdere og gradert av en tredjepart. Dette gjelder også anmerkninger som er skjult pga. slabben som f.eks. anhengsspor, filemerker ol.
9. Alle forhåndsbud til auksjonen må gis skriftlig og være mottatt auksjonshuset i god tid før auksjonen starter. Fore-spørsel om budgivning på telefon aksepteres på objekter fra minimumsutrop på 5000 NOK. Avtaler om telefonbudgivning må senest gjøres siste arbeidsdag før auksjonen.
10. Budgivere som byr for andres regning er solidarisk ansvarlig for betaling av kjøpet, hvilket betyr at auksjonshuset kan forholde seg til både budgiver og tredjepart for oppgjør.
11. Alle bud gis i norske kroner og et objekt betraktes solgt til den som har høyeste bud. Ved flere identiske forhåndsbud gjelder budet som først er mottatt av auksjonshuset. I tilfeller med identiske bud fra sal og internettplattformer vil bud fra salen bli prioritert.
12. Prisene i denne katalogen er minstepriser og bud under disse vil ikke bli akseptert. I tillegg til salgssummen tilkommer 20 % salær. Mynter og sedler som har vært gyldig betalingsmiddel er unntatt mva. For medaljer tilkommer 25 % mva på salæret ved levering i Norge. Avgiftspliktige objekter er merket med * ved objektnummeret. Alle forsendelser innenlands skjer med sporbar post og belastes med minimum NOK 200, -. Alle forsendelser til utlandet sendes med DHL eller Fedex (minimumspris i Europa NOK 690,-). Kjøper kan også hente auksjonsobjekter hos auksjonshuset sine kontorer i Oslo og Haugesund. Kjøper står selv ansvarlig for å oppgi riktig adresse for fakturering og forsendelse, og auksjonshuset står ikke ansvarlig for feiladresserte forsendelser som skyldes manglende eller feilaktig informasjon fra kjøper.
13. All betaling må skje i NOK (norske kroner) og kjøpesummen må være godskrevet vår konto senest 7 dager etter at faktura er utstedt. Ved forsinket betaling påløper 1 % rente pr. påbegynt måned. Hvis betaling ikke er godskrevet auksjonshusets konto innen 30 dager etter at auksjonen er avholdt, kan auksjonsobjektet selges for kjøpers regning og risiko. Auksjonshuset bestemmer alene på hvilken måte slikt salg gjennomføres og uten videre meddelelse til den opprinnelige kjøper. Opprinnelig kjøper står derfor selv ansvarlig for ethvert økonomisk tap, herunder tapt provisjon og redusert salgspris. Eventuelle omkostninger i forbindelse med inkasso og videresalg blir også belastet den opprinnelige kjøper.
14. Ved vederlag i kontanter kan vi kun motta beløp inntil kr 20.000 per kunde, jf. Hvitvaskingsloven § 4a.
15. Risikoen for kjøpet går over til kjøper ved klubbeslag, dog går ikke eiendomsretten over til kjøper før kjøpesummen er betalt i sin helhet. Auksjonshuset er ansvarlig for at objektene oppbevares på forsvarlig måte inntil de er fysisk overlevert til kjøper eller fraktfirma. Alle forsendelser skjer på kjøpers regning og risiko, og kjøper må selv sørge for forsikring av forsendelsen. Auksjonshuset er ikke ansvarlig for sendinger sittende fast hos utenlandsk tollvesen, pga. lokale tollregler. Det samme gjelder for sendinger som er nektet mottatt av kjøper.
16. Alle norske mynter preget før 1538, med enkelte unntak, vil ikke kunne eksporteres ut av landet. For budgivere som byr online vil aktuelle objekter med denne restriksjonen være merket.
17. Innleverere får utbetalt hammerslag fratrukket selgerprovisjon cirka 4-6 uker etter auksjonsslutt.
18. Hvis det til tross for dette reglementet skulle reises innsigelser mot auksjonshuset eller innleverer, må slikt gjøres innen 14 dager etter at objektet er utlevert eller mottatt via post. Innsigelser kan ikke gjøres dersom objektet ikke er betalt innen 30 dager etter auksjonsdato.
19. Oslo vedtas som verneting for alle tvister som måtte utspringe fra denne auksjonen eller dette reglementet.
20. Auksjonshuset tar forbehold om at det kan bli foretatt endringer av auksjonsreglementet mellom auksjonene.

OLAV KYRRE 1066-1093

I april 1909 lekte noen smågutter i en steinrøys på gården Maage ved Sørfjorden i Ullensvang kommune. I steinrøysen fant de en liten kleberstensskaal med bunnen opp og under denne lå det en hel del mynter. Totalt ble det funnet ca 260 mynter hvorav ca 240 norske.

Alle de norske var preget under Olav Kyrre, med unntak av en penning fra Harald Hardråde. I funnet var det også 8 mynter fra danske kong Svend Estridsen (1047-1074). I boken Norske myntfunn 1050-1319 av Svein H. Gullbekk og Anette Sættem er tidligste nedleggningstidspunkt satt til år 1080 (TPQ).

Myntene selges på vegne av Romsdal myntforening, som har overtatt myntene fra myntsamlere Knut Bolstad fra Hamar, som var barnebarn av en finnerene. Gutten skal ha fått myntene av konservator (senere professor) ved Bergen museum Haakon Shetelig som finnerlønn.

I mai 1840 under rydding av en steinrøys på gården sin på Nes på Hedmarken kom bonden Anders Andersen over en skatt på nærmere 5000 mynter. De fleste myntene var løvtynne brakteater på under 0,1 gram. De bar stort sett enkle motiver som bokstaver, det være seg A, B, E, H, N, S, T eller V, men også kors og noen få bar portretter. Hva disse bokstavene står for har vært flittig diskutert uten at en endelig konklusjon har blitt trukket. Noen få større og tyngre mynter var også i funnet, de fleste av disse bar navnet til Sverre Sigurdsson (1177-1202), således har man tolket funnet til å være fra kong Sverres tid. Den ærlige bonden leverte funnet inn til Universitetets Myntkabinett mot betaling mens han fikk beholde råsølvet på ca 300 g. Funnet ble publisert i 1841 av professor A. Holmboe, bestyrer ved Universitetets Myntkabinett i Christiania, selvfølgelig på latin.

Første kilde til erkebiskopene i Nidaros utmynting er i et privilegiebrev fra kong Håkon Håkonsen til erkebiskop Guttorm i 1222, hvor erkebiskopene får innvilget retten til å gi ut mynt. Under erkebiskop Gaute Ivarsson preges det hvider og hulpenninger. Både Erik Valkendorf og Olav Engelbrektsson gir ut mynter med eget preg, mens Gaute begynner med å gi ut kongelige typer, som gradvis glir over til erkebispesetets ikonografi. Ifølge Jon Anders Risvaag er det gjort beregninger av volumet på Gattes utmynting. En arbeidstokk på to-tre mann og mange tidkrevende operasjoner tilsier at man maksimalt kan ha preget ca. 60.000 mynter i løpet av et år om man bare preget mynt i verkstedet. Når vi i tillegg vet at myntverkstedet har vært brukt til andre ting, er det sannsynlig at tallet kan være betydelig lavere.

JOHAN SÆTTEM

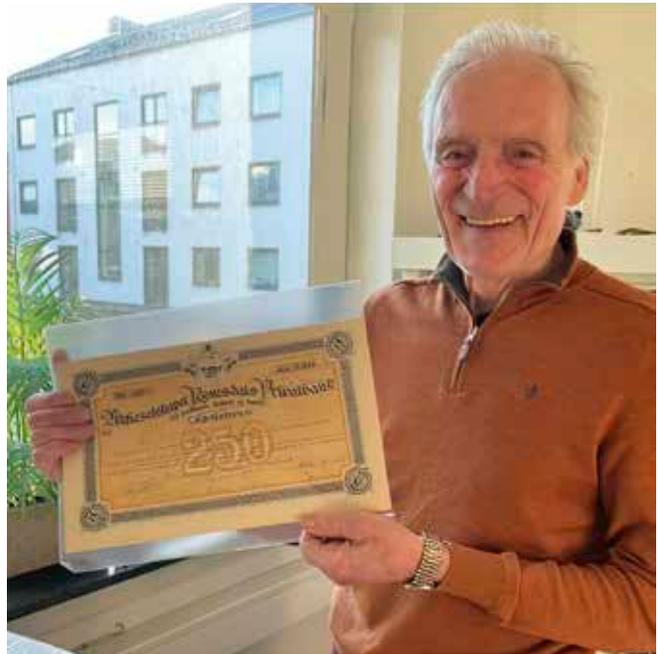

Johan Sættem er født i 1946 og vokste opp etter krigen i to handelshus: Storgata 35, hvor morfaren holdt til og Storgata 41, hvor familien bodde og faren drev virksomheten sammen med 2 brødre. Der bodde Johan fram til 1960.

Han har alltid hatt en sterk samlerinteresse, med alt fra guttebøker og blader til frimerker. Myntinteressen ble for alvor vekket i 1977, da en fetter fikk kjøpt en stor pose med sinkmynter i banken og tilbød Johan en komplett samling. Året etter, i 1978, ble Romsdal Myntforening stiftet, og etter anbefaling fra Webjørn Steen meldte Johan seg inn. Med anskaffelsen av Sørensens myntkatalog fikk samlingen en mer systematisk og målrettet form.

På 1970-tallet abonnerte familien på Adresseavisen, og i lørdagsutgaven var det ofte annonser for mynter. Gjennom disse kom Johan i kontakt med Willy Johansen. Noe av det første han kjøpte av ham var de sjeldne 2-kronene, og Johansen ble en nær samlekollega gjennom mange år.

Myntklubben utviklet seg til et stort og aktivt fellesskap for myntsamlere, og har holdt et høyt aktivitetsnivå helt fram til i dag. Johan var formann i klubben i ti år på 1990-tallet, noe han ser tilbake på som en stor glede. Etter hvert ble det også regelmessig deltakelse på Oslo Mynthandels auksjoner to ganger i året – besøk han alltid så svært fram til. Her knyttet han mange gode bekjensheter og ble også medlem av Norsk Numismatisk Forening.

Interessen for litteratur ble vekket tidlig, og særlig numismatisk faglitteratur ble studert grundig. Mesteparten av boksamlingen ble solgt hos oss i Oslo Myntgalleri året før han avsluttet sin aktive samlerkarriere.

I 1988 gjorde Johan et avgjørende valg da Gunnar tilbød ham tre flotte speciemynter. Han solgte da krone- og øre-samlingen og gikk fullt og helt over til mynter fra 1600- og 1700-tallet. På OM-auksjon nr. 12 kjøpte han sin første specie. Han var heldig som fikk oppleve samlingene til Christensen, Reff, Bugge, Ringøy og ikke minst storsamleren Zinck, hvor han gjorde flere betydelige kjøp.

I dag er også Bruuns samling – den største av dem alle – kommet på markedet. Den er ufattelig stor og til stor glede for samlere som har kommet til etter Johan. Selv ble det kun én Bruun-mynt på ham. Nå er samlerkarrieren avsluttet, og vi er stolte av nå å kunne videreformidle noe av Johans samling til kanskje noen nye samlere.

DEN DANSKE SPECIEDALERSERIEN FRA 1624

Danmark-Norge hadde frem til 1620-årene ingen stabil egen tilførsel av sølv eller gull. Oppdagelsen av sølvforekomsten ved Kongsberg i 1623 fikk derfor stor betydning for kong Christian IV og rikets finanser, og kom snart også til å prege utviklingen av rikets myntvesen. Kort tid etter ga kongen ordre om å prege en ny serie speciedalere, delvis basert på det nyoppdagede sølvet.

Serien, introdusert i 1624, omfatter fem valører fra ½ til 4 dobbel speciedaler, utført i et nytt og rikt utformet design. Samtidige kilder omtaler en kongelig bestilling på ti komplette sett av serien, tiltenkt som gaver til kongens barn. Bestillingen er ofte blitt tolket som et uttrykk for

den betydning, som funnet av sølvet ved Kongsberg fikk for kongen og hans finansielle situasjon.

Reversen viser riksvåpenet omgitt av tetten provinsskjold, hvis utforming i de tidligste utgavene forekommer i flere varianter. De sjeldne typene med såkalte spanske og tyske skjoldformer forekommer for 1 og 2 speciedaler, samt for 3 speciedaler med tysk skjoldform.

Den foreliggende samlingen, oppbygget over omkring tre tiår, gir en usedvanlig bred dokumentasjon av denne tidlige og historisk betydningsfulle serien. Den illustrerer et viktig møtepunkt mellom nye naturressurser, kongelig representasjon og pengepolitikk i Christian IVs tid.

CHRISTIAN IV 1598-1648

DE FØRSTE NORSKE SPECIEDALERNE, 1628

I direkte forlengelse av den danske speciedalerserien av 1624 fikk oppdagelsen av sølvforekomsten ved Kongsberg i 1623 også konsekvenser for myntpregningen i Norge. I 1627 besluttet Christian IV at et myntverk skulle opprettes i Christiania. Den dansk-norske gullsmeden Anders Pedersen ble utnevnt til myntmester, og kongens administrasjon fastsatte detaljerte bestemmelser for pregningen av mynter basert på sølvet fra Kongsberg.

I de første årene var pregningen i Christiania i hovedsak begrenset til speciedalervalører, med den første serien preget i 1628. Den foreliggende serien står dermed i nær forbindelse med opprettelsen av det nye myntverket i Myntgaten i Christiania, ved siden av Akershus festning, og markerer begynnelsen på norsk myntpregning basert på rikets egne sølvressurser.

DE SISTE SPECIEDALERNE UNDER MYNTMESTER ANDERS PEDERSEN, 1642

I oktober 1642 reiste Christianias første myntmester, Anders Pedersen, til København for å avklare uenigheter omkring sine regnskaper. Selv om saken ble ordnet, mistet han sin stilling til Peter Grüner. Serien fra 1642 markerer dermed avslutningen på den første perioden av norsk speciedalerpregning under Anders Pedersen, innledet i 1628.

Following Franz II's proclamation as Emperor of Austria in 1804, this coin reflects the brief period of dual imperial status: the Austrian shield is surmounted by the Austrian house crown, while the old Imperial Crown hovers above the double eagle. Archduke Albert VII of Austria and the Spanish infanta Isabella Clara Eugenia ruled the Spanish Netherlands jointly from 1598 to 1621, having received the provinces from Philip II of Spain as a semi-independent Habsburg branch. Their reign forms one of the most distinctive episodes in the coinage of the Low Countries, as their shared sovereignty produced a deliberately unified monetary imagery that asserted dynastic legitimacy while signalling the re-establishment of stable princely rule in the southern Netherlands.

- 205^x Christian IV 1588-1648. Rhinsk gylden 1625. 3,12 g. Tidligere beskrevet som «Samtidig forfalskning?. Justermerker, har vært montert». Det må være en samtidig forfalskning. Den er forgylt/gullbelagt. Det er ikke justermerker, men eldre testmerker, som går gjennom gullbelegget. Motivets grovere stil, se f.eks. kronen og «løvene» på reversen, avviker også markant fra ekte eksemplarer. Samtidige forfalskninger av danske 1600-talls gullmynter er sjeldne og interessante, og dette eksemplaret har dessuten en fin samlerproveniensen.

The presence of elephants in two quarters of the family arms is unusual. Their origin is uncertain: one tradition links them to a supposed ancestor named Helfrich, said to have served in a Roman force that once opposed Hannibal, while a more widely accepted explanation interprets the device as a Namenwappen, derived from the phonetic similarity between Helfenstein and elephant.

The Pinneberg Interim Recess of 1679 was a temporary truce in Hamburg's long struggle to free itself from Danish overlordship. To avert a siege by King Christian V, the city paid 220,000 Reichstalers and formally pledged loyalty, receiving assurances that its trade, rights, and privileges would remain untouched. The dual titulature of Johann Georg I and his brother August reflected a dynastic arrangement intended to provide for a younger brother without dividing the Electorate. It served to preserve political balance and internal stability within Saxony, the largest Protestant state of the Empire, on the eve of the Thirty Years' War.

A Thaler with a clear historical link to Protestantism. Sachsen-Gotha was a firmly Lutheran territory, and the Ernestine rulers saw the foundation and consecration of churches as an expression of princely authority and confessional identity. The dedication of the palace and church at Friedrichswerth therefore reflects the close bond between dynasty and Lutheran church life in the late 17th century.

*The so-called British Trade Dollar was a silver coin issued from 1895 for use in British colonies in East Asia, intended to replace the widely circulating Mexican «dollar» and functioning as a trade coin rather than a sterling-denominated British currency. Its design reflects this role, combining a Western imperial obverse with a reverse showing the denomination in Chinese characters and Malay script, emphasizing its purpose for international commerce in the Far East.

 Struck early in the reign of Catherine II, this impressive ten-rouble issue reflects the consolidation of her authority following her accession in 1762. The richly adorned portrait emphasizes imperial power and marks a clear artistic shift from the earlier coinage of Peter the Great. The refined style has often been associated with the influence of the Geneva medallist Jacques-Antoine Dassier, who had visited the St Petersburg mint a few years earlier.

Late issue of the quadruple Excelente struck at Segovia under Juana and Carlos, likely 1537–1543, among the final emissions before the type was discontinued in 1543. It represents a prestigious and highly regarded gold type whose undervalued official rate led to substantial export from Castile.

The Royal Mill Mint of Segovia, established in the 1580s under Philip II, was one of the earliest mechanised mints in Europe, using water-powered rolling and striking technology to produce large, accurately weighted silver and gold coins. Issues of this type were often struck from metal supplied by private clients or ordered directly by the Crown, and contemporary records show that such commissions could be executed with remarkable speed, sometimes within only a few weeks. These coins therefore reflect both the technical capacity of the Segovia mill mint and the strong demand for high-value precious-metal coinage during the financially strained reign of Philip IV.

 Ex. Vico 138, 06.03.2014, lot 1004

The production of 8 Escudos at Segovia during the reign of Charles II reflects the financial pressures on the Spanish Crown, particularly the need for gold to fund wars and state expenses. Fluctuations in the gold supply affected the intrinsic value of the coinage, while the Segovia mint faced technical and logistical challenges in maintaining weight, fineness and consistency—factors essential for confidence in the Spanish monetary system. These coins thus represent an important legacy of Spain's political and economic role under the later Habsburgs.

Johan av Östergötland (1589–1618), sønn av Karl IX, var hertug av Östergötland og tilhørte Vasa-dynastiet; hans navn forekommer på mynter som uttrykk for dynastisk representasjon snarere enn selvstendig maktutøvelse. Denne taleren hører til de store sjeldenhetene i Osnabrücks mynthistorie. Under den svenske okkupasjonen 1633-1643 måtte byen betale store summer i spesiedalere, noe som førte til at betydelige mengder sølv, også fra kunstgjenstander, ble smeltet om. Av dette sølvet ble trolig talere preget til minne om Gustav II Adolfs død ved Lützen i 1632, selv om skriftlige kilder mangler. Eksemplarene er ujevnt preget og svært sjeldne, særlig de fra det første stempelparet.

Little is known of Antinoüs before he became the favorite of emperor Hadrian. He was born in Claudiopolis, in Bithynia around AD 111 and he was likely introduced to Hadrian around in AD 123 when the emperor visited the province. Antinoüs made a lasting impression on the emperor and was sent to Italy to get a higher education. When Hadrian returned to Roma from the east in AD 125, he quickly developed a relationship with Antinoüs, and the youth became his favorite lover. From what we know, their relationship was built on mutual affection and Hadrian reportedly found the young man to be both intelligent and handsome.

Hadrian and Antinoüs embarked on a tour of the eastern provinces in AD 128 and visited Greece, Asian Minor, Syria, and Egypt. However, disaster struck during a river cruise on the river Nile in AD 130 when Antinoüs fell in the water and drowned near Hermopolis Magna. He died just a few days short of his 20th birthday. The circumstances around his death remain a mystery and we are not sure if his death was a result of an accident, suicide or even staged by Hadrian himself.

Hadrian ordered him to be deified as a god and he created a cult devoted to his worship. He also founded the city of Antinopolis on the banks of the Nile. Antinoüs was worshipped both as a god and a hero at many temples in the east and the western part of the empire, and coins were struck to honor his memory. His cult and worship endured long after the death of Hadrian. This remarkable medallion was struck at Smyrna describes Antinoüs as a hero even if the goat and the caduceus on the reverse are symbols associated with the Greek god Hermes. From the reverse legend we can read that the medallion was produced or at least ordered by a certain Polemon as a dedication to the young hero. This is surely one of the finest coins of Antinoüs in existence.

The death of Constantine I (the great) in AD 337 unleashed a brutal conflict between his three sons Constantius II, Constans and Constantine II who all wanted their share of imperial power. Their consolidation of power started with the orchestrated deaths of their half-cousins Hanniballianus and Delmatius. The three brothers then divided the empire between them. However, Constantine II was the least fortunate of the three and he was not satisfied with his territorial share that comprised of Hispania, Gaul and Britannia. He also demanded control of North Africa and Italy from Constans. Constans rejected his demand and Constantine II invaded Italy in AD 340. His campaign was cut short when he was killed in an ambush near Aquileia the same year.

This magnificent medallion was likely struck to commemorate Constans' victory over Constantine II. However, Constans' successful campaigns against the Franks in AD 341-342 and his visit to Britain in AD 343 are also possible occasions for this emission.

Constans himself is described as a cruel and depraved man by contemporary sources. In AD 350 he was overthrown by his guard commander Magnentius during a campaign in Gaul. He tried to flee towards Spain but was hunted down and killed before he could cross the Pyrenees.

NYERE NORSKE MEDALJER/MODERN NORWEGIAN MEDALS

763

763* Moderne immitasjon/modern imitation: Fiigenschou 10 dukatt, en fantasifull og humoristisk reproduksjon av Christian IVs norske speciedaler fra 1637. 40 mm, 42,66 g

Denne gullmedaljen er i 14 karat gull, preget i Bergen hos Brødrene Lohne, i kun 3 eksemplarer. 01 15 000

Ser man nøye etter på bildet av denne «mynten», oppdager man at den har en meget uvanlig utforming. Denne typen har i grove trekk samme design som en Speciedaler fra regjeringstiden til Christian IV. Forskjellen ligger i at portrettet tydelig viser et løveansikt, samt at våpenskjoldet avbilder en avkledd mann med typisk 1600-tallsparykk samt englevinger.

I 1962 ble de første eksemplarene av denne underlige mynten funnet i åkeren til Agdalv Kjomslø i Østre Tråffell i Slomveng kommune. Etterhvert dukket det også opp flere eksemplarer i Kjell O. Dahlgate, og her ble det funnet tre 10 dukatt, og opp imot 50 eksemplarer av Speciedaleren, samt ca 20 stk Bjefimok, alle med årstallet 1637, sammen med maleriene. Denne gav speciedaleren med katteportrett tilnavnet «Fiigenschou-daleren».

790

790* Grand Cross of the Order of the German Eagle/Grosskreuz des Ordens vom Deutschen Adler. Complete set with Grand Cross/Grosskreuz, 80.6 x 80.6 mm, Cross of Merit/Verdienstkreuz, 59.8 x 67 mm, and ribbon. In original box of issue, 20.4 x 29.4 cm. Box with some wear and a few minor scratches on the enamel of the Grand Cross. Excellent condition.

The Order of the German Eagle was instituted on 1 May 1937 by Adolf Hitler and lasted until the end of The Third Reich/World War II. It was a diplomatic and honorary order given to prominent foreigners, primarily diplomats. From 1937 to 1943 the order had six classes, the Grand Cross was the highest, but Mussolini received a special one in gold with diamonds in September 1937.

This Grand Cross was awarded to the Dane Herluf Zahle (1873-1941) in 1939. Zahle was born into a well-known family of lawyers. He obtained his Master of Laws in 1897, and joined the Ministry of Foreign Affairs and e.g. worked in Copenhagen, Paris, Stockholm, London, and Berlin. From 1910-13 he was Head of the Ministry's Second Department. From 1913, he was Head of the Ministry of Foreign Affairs' First Department. From 1919 to 1924 he was Gesandt (ambassador) in Stockholm, and he was thereafter Danish Gesandt in Berlin 1924-1941. Zahle was also Denmark's representative in the League of Nations 1920-1927, and for a year (1928-1929) he was president of the assembly.

Zahle was awarded the Grand Cross of the Order of the German Eagle shortly after the signing of the German-Danish Non-Aggression Pact on May 31 1939. In the treaty the two countries pledged not to use force against each other, it was signed by the German Minister of Foreign Affairs Joachim von Ribbentrop (1893-1946) and Zahle. The later acted on behalf of the Danish Ministry of Foreign Affairs, since the Danish Minister of Foreign Affairs P. Munch (1870-1948) did not travel to Berlin for the signing.

Germany attacked and occupied Denmark in April 1940 without significant Danish resistance, and Danish foreign and military policy, the treaty, the attack, the occupation etc. have been heavily debated ever since.

Zahle did report to the Ministry of Foreign Affairs, prior to the attack, of a significant increase of German forces in Baltic ports, as well as rumors of possible attacks on Denmark and Norway.

This object has it all. It is rare and complete with significant provenance and in lovely condition. It is directly linked with still highly debated historical events related to Denmark, Germany, World War II etc.

A true gem for any collector or museum. It is hard to exaggerate its significance:
An impressive Order with the utmost relevance for important parts of Danish 20th century history.

Passed down through Zahle's family to the present owner.

NILS HENRIK SJO

Nils Henrik Sjo, født i 1958, har hatt en livslang interesse for numismatikk. Samlergleden startet tidlig, da han som gutt fikk en sigarkasse med mynter av sin far. Denne første introduksjonen tente gnisten som siden har holdt ham aktiv i det numismatiske miljøet.

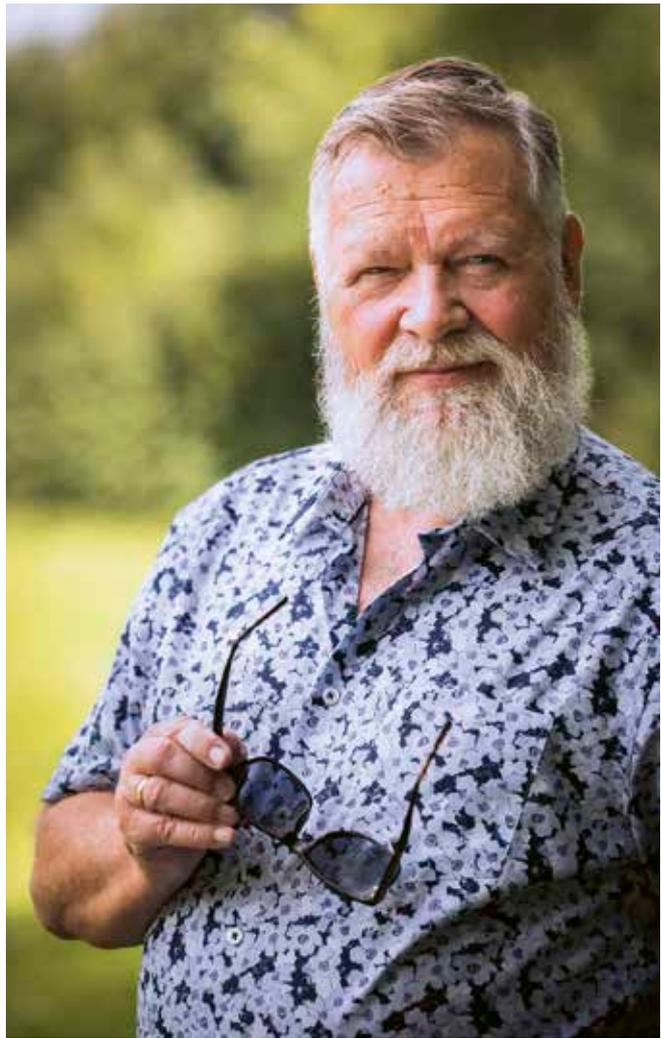

Fra 1991 drev han Myntgalleriet AS, som han bygget opp og utviklet frem til rundt 1997. På denne tiden foregikk mye av handelen med mynter og sedler gjennom salgslister og skriftlige auksjoner – i et marked som var fundamentalt annerledes sammenlignet med dagens digitale handelsplattformer.

Kinasamlingen har vært en sentral del av Nils Henriks samlervirksomhet og fungert som en inngangsport til dypere interesse for både historie og kultur. Det er nettopp denne variasjonen og muligheten til å fordype seg i materien han trekker frem som noe av det mest fascinerende ved numismatikken. Samlingen av kinesiske sedler ble påbegynt i 1983, etter kjøpet av en mindre samling fra Oslo Mynthandel. Spesielt variasjonen i utstedere og utforming, som for eksempel sedlene fra Sino-Scandinavian Bank med vikingskipmotiv, har gjort samlingen både særpreget og historisk interessant.

Et viktig tilskudd kom på midten av 1990-tallet, da han fikk muligheten til å kjøpe hoveddelen av kinasamlingen til Tom Arby, kjent for sin omfattende samling av kinesiske sedler og stor kunnskap om temaet.

På 1990-tallet reiste Nils Henrik mye internasjonalt og gjorde flere spennende funn rundt om i verden, både av numismatisk og annen kulturell interesse. Selv om han kun har besøkt Kina én gang, fikk han blant annet oppleve en vandring på Den kinesiske mur. Samtidig er det verdt å merke seg at mange av de mest interessante objektene i samlingen faktisk er anskaffet i Norge.

Bakgrunnen for dette ligger blant annet i at mange nordmenn allerede på 1800-tallet ble rekruttert til den keiserlige kinesiske administrasjonen, som hadde stort behov for vestlig kompetanse på mange områder. Myndighetene foretrakk ansatte fra små vestlige nasjoner som Danmark, Norge og Sverige, fremfor stormakter som USA, Tyskland og Storbritannia. Mange fikk ansvarsfulle stillinger bl.a. innen tolletaten og i det kinesiske postvesenet.

Flere tok med seg mynter, sedler og andre suvenirer hjem, bl.a. general Johann Wilhelm Normann Munthe som også tok initiativ til opprettelsen av Sino-Scandinavian Bank. Et annet kjent eksempel er Christian Fredrik Wyller Schjøth. Hans myntsamling befinner seg i dag på Myntkabinetet.

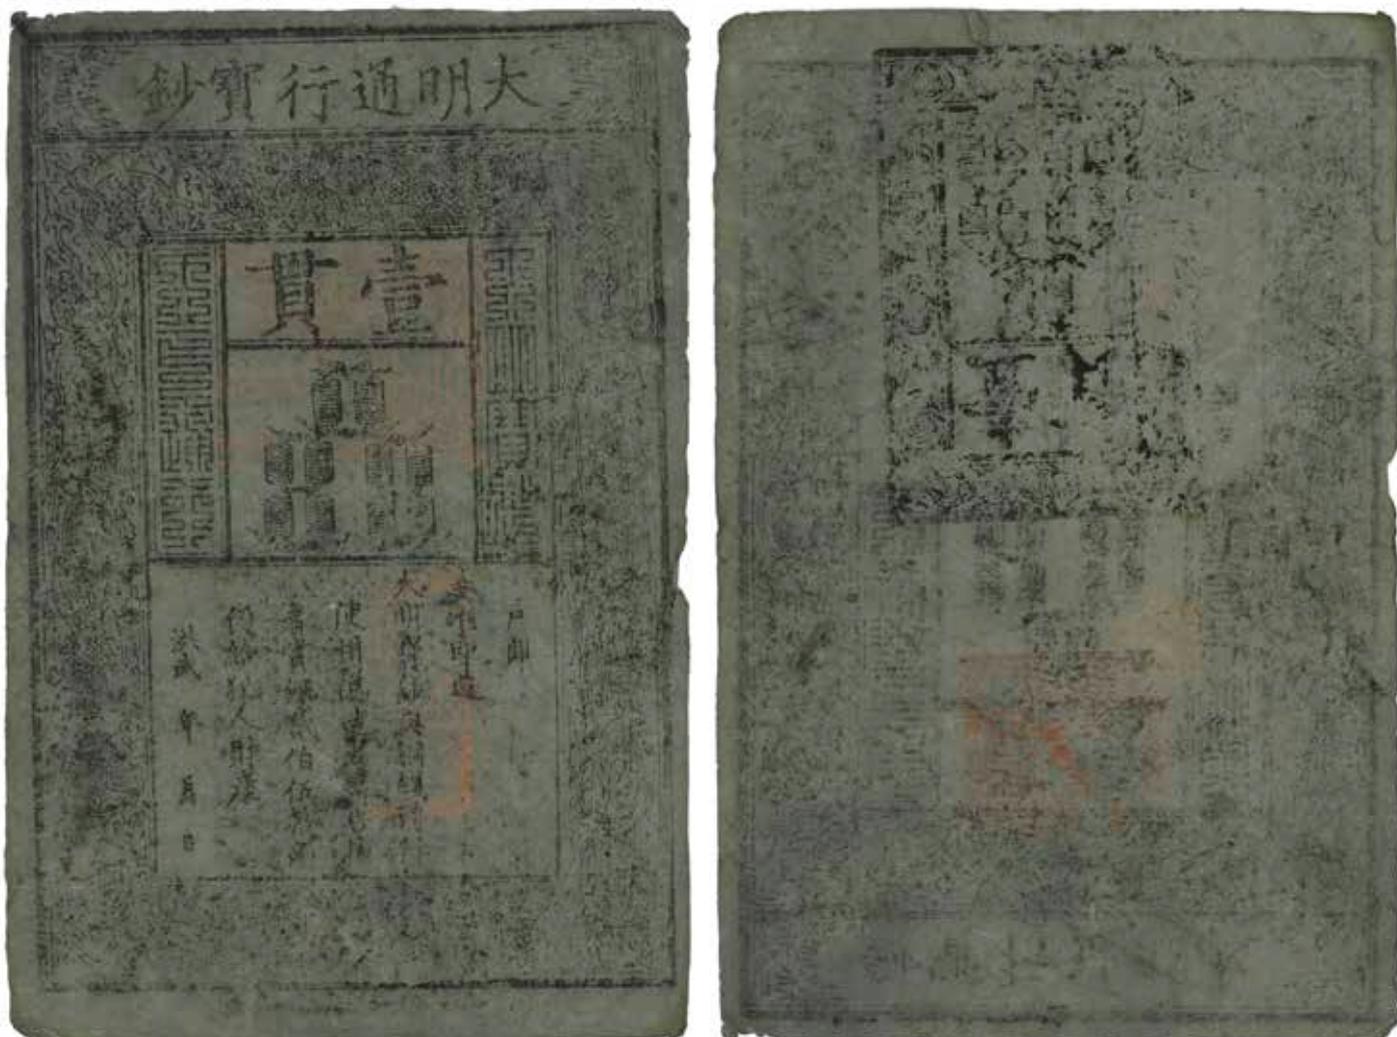

Kinas politiske historie preges av store omveltninger, særlig med den japanske okkupasjonen på 1930-tallet. De kaotiske og dramatiske periodene gjenspeiles tydelig i samtidens seddelutstedelser – både i motivvalg, tekst og utforming – og gir samlingen et sterkt historisk og fortellende preg.

I dag er Nils Henriks hovedfokus rettet mot antikke mynter. Salget av kinasamlingen gir ham muligheten til å fordype seg ytterligere i et nytt og spennende samlersområde.

Vi i Oslo Myntgalleri takker for tilliten, og presenterer på de neste sidene hans innholdsrike Kinasamling.

 Ex. Christian Fredrik Wyller Schjøth (1846–1935), Chinese Consul General and numismatist.
 The Imperial Bank of China was the first Chinese bank to operate under Western norms and as such this note has great historical as well as collectible value.

Christian Fredrik Wyller Schjøth (1846–1935) was a Norwegian customs officer, diplomat, and pioneering numismatist with a remarkable 36-year career in the Chinese Imperial Maritime Customs Service. Born in Kristiania (Oslo) into a merchant family, Schjøth went to London as a young man, where he was recruited into the Chinese customs service.

He arrived in Shanghai in 1868 and quickly distinguished himself. Mastering the Chinese language, he rose steadily through the ranks, becoming head of the customs station in Shantou in 1875. In 1893 he was awarded the third civil rank in the Qing bureaucratic system—one of the highest distinctions available—and in 1896 he became a full

Commissioner in the revenue department, among the most influential foreign officials in the treaty ports. His duties included not only customs administration but also detailed economic reporting; one of his reports was published in the North China Herald.

After retiring from active service at 57, Schjøth continued to serve Chinese interests. In 1906 he was appointed China's first Honourable Consul General in Kristiania, a post he held until 1921. He received high Chinese decorations, including the Order of the Double Dragon (1906) and the Order of the Golden Grain (1917). Alongside his diplomatic career, Schjøth became a leading scholar of Chinese coinage. His major work, *Chinese Currency*, was published in 1929 and later reprinted in 1965 and 1976. His important collection of Chinese coins is today preserved at the University of Oslo Coin Cabinet (Myntkabinettet). He died in Oslo in 1935.

Ex. Oslo Myntgalleri A/S auction 23, 29.11.2020, lot 1343.

Danzig (today Gdańsk, Poland) has a long and complex history shaped by its strategic location on the Baltic Sea. Founded in the early Middle Ages, it became an important trading city and a member of the Hanseatic League. Over the centuries, Danzig was ruled by Poland, the Teutonic Order, and Prussia, while often enjoying a high degree of autonomy. After World War I, it became the Free City of Danzig under League of Nations protection, which created tensions between Germany and Poland. In 1939, Nazi Germany's demand for Danzig helped trigger World War II. After the war, the city became part of Poland and was renamed Gdańsk, later gaining global significance as the birthplace of the Solidarity movement in the 1980s.
